CEYHUN CANYURT

PROFILE

Hello, I am Ceyhun, I am 31 years old, I am a computer engineer. I am improving myself in software, I am open to further development. I continue to provide remote services as a software engineer for NextGen Software in the USA(remote). My latest professional projects and the languages I actively use are included in my CV.

COMMUNICATION

Nationality:
T.C

Telephone Number:
+90 545 616 1043

E-Mail:
ceyhun.canyurt@gmail.com

Address:
Gediz/Kütahya

Marital status :
Married

Date of birth:
18.05.1992

Linkedin:
https://www.linkedin.com/in/ceyhun-canyurt-652ba8225/

HOBBY

Football
Volleyball
Ping pong
Basketball

Software Engineer

EDUCATION

Dumlupınar University Department of Computer Engineering

Simav Anatolian Teacher High School

SOFTWARE SKILLS

React, Angular, Unity, Javascript, Typescript, Html, CSS, Python,

AWS(Amazon Web Services), Dynomo Db, Pl/Pg SQL, My/Ms SQL,

Postman, Flask, Vue.js, Nuxt.js, Next.js, Tailwind

PROFESSIONAL PROJECT

Professional Web Site Professional sites that I built the following web applications, you can see as referance:
nextgensoftware.us (vue.js, nuxt.js),
trendygets.com (nuxt.js, tailwind)

Iris Recognition System Matlab Dissertation is a desktop application with Oracle Db. I used the Casia iris dataset as an example. You can add new irises to the database and check for matches with previously added irises

Extension Project I am involved in the development of a Google Extension Project that covers both web and mobile applications. In this project, I implemented an API using Python and Flask for seamless communication between the extension and the web interface. The architecture includes a combination of React and Angular and provides a robust and dynamic user experience.
To enhance data retrieval, I incorporated a Scraper component utilizing Selenium. This powerful tool extracts data from web pages and efficiently stores it in AWS DynamoDB, ensuring a streamlined and organized database.
You can visit the site and application I prepared for **paypeek.com**.

Paypal Payment System I added the paypal payment system to the **tier25.com** site using the paypal APIs.

JOB EXPERIENCE

SOFTWARE ENGINEER – NextGen Software– 01/01/2022 – NOW – BOCA, USA (remote)

(Web-Mobile – I code the website and extenion application. Angular and React applied projects are over, now I have received feedback for the C# project and started developing it. I actively use many software languages and technologies that I have incorporated. I have written websites according to customer demand and there are ongoing projects..)

UNITY DEVELOPER – Unlimited Education Services - 01/09/2021 – 15/12/2021 – ISTANBUL, TURKIYE

(I took part in the English game and application project for the smart board system of the schools in the software team affiliated with the publishing house company. I experienced my Unity and c # knowledge from here.)

SOFTWARE DEVELOPER – Medikal Sofware - 01/07/2021 – 01/09/2021 – ISTANBUL, TURKIYE

(I took part in the team that provides technical support for MR and Tomography devices in hospitals. I gained experience by using SQl varieties in this institution.)
